Abstract. General Secretary Xi Jinping stressed that "make good use of red resources, carry forward the red tradition, and pass on the red gene", which points out the direction for the integration of red resources into ideological and political teaching. The red cultural resources highly condensed the revolutionary history and the indomitable struggle history of the Communist Party of China. It highlights the heroic epic of the Communists staying true to the original aspiration and fulfilling the grand mission in the course of China's revolution, construction, reform and even the development of the new era, and has the precious significance of The Times. In recent years, the teaching research of red resources into ideological and political theory course mainly focuses on the regional red resources into ideological and political course teaching.

Keywords: New media background Shenyang red resources, ideological and political theory teaching and research.

1. On the Research Status of "Red Resources Integrated Into Ideological and Political Theory Teaching"

General Secretary Xi Jinping stressed that "make good use of red resources, carry forward the red tradition, and pass on the red gene", which points out the direction for the integration of red resources into ideological and political teaching. In recent years, for red resources into the ideological and political theory course teaching research, mainly for regional red resources into the ideological and political teaching, the Jinzhou red culture melting education courses teaching mode research yuan-yuan zhang, the Liaoning red resources into the ideological and political theory course strategy research Li Zige, Shenyang local red resources into the "four" education, Lv Ying, etc. From the perspective of new media background, he carries out ideological and political theory teaching research. In recent years, he is Zhang Xinyue of ShenyangThe basic funamental of BP neural network.

2. An Outstanding Problem That Needs to Be Solved Urgently

2.1 Shenyang red resources in ideological and political education teaching has limited influence

There are still differences in the understanding of the red resources of Shenyang Party history, which are mainly reflected in the teaching. The study of the local historical materials of Shenyang martyrs is not deep, and the explanation is not sufficient and convincing. Although some martyrs in history, but teachers are not enough to understand, even do not know its existence, the spirit of the promotion is still not enough. Although some bases are well known and well publicized, not all students have the opportunity to exercise and study. At present, colleges and universities will integrate the party's theory, line and ideological policy in the basic ideological and political courses, but they are not in place in ideology, education and learning, and civilization propaganda. .In the process of daily education management, the understanding

BP neural network is back propagating, mainly composed of three parts: input layer, middle layer and output layer. The number of nodes in the input and output layers is relatively easy to determine, but the determination of the number of nodes in the hidden layer is a very important and complex problem.

2.2 The lack of identity with Shenyang red resources inhibits its penetration into the teaching of ideological and political theory To promote the integration of Shenyang red resources into ideological and political education, colleges and universities are unshirkable in education.

College students' lack of identity with Shenyang red resources is mainly due to their ignorance of the local red resources in Shenyang. Shenyang red resources are the crystallization of wisdom condensed by the hard work of countless Chinese people, containing a variety of cultural thoughts, spiritual concepts and moral adherence. However, some college students are not familiar with these excellent red resources. They spend most of their time on online games and social chat, and rarely read classic books, resulting in a relatively superficial cognition of red resources. In addition, some colleges and universities do not pay enough attention to the single teaching form of ideological and political theory courses, so that the red resources can be well integrated into the campus culture, and some college students do not have a deep understanding of the red resources. In the process of political and ideological education in colleges and universities, because there are still various problems in educational methods, the students do not pay enough attention to ideological and political education and lack of psychological identity, which affects the implementation of red resources in Shenyang to a certain extent.

2.3 The development, protection and utilization of Shenyang red resources need to be improved All colleges and universities in Shenyang have actively participated in the media exhibition of red school history stories held by the Education Department of Liaoning Province, showing the red school history of each school on the network platform, setting off a new climax of party history learning for college students. With the efficient sorting, integration, development and utilization of red resources in Shenyang, many universities actively cooperate with the government cultural relics departments to develop a large number of revolutionary sites into patriotic education bases, and become an effective carrier and ideal place for the education of red cultural resources.

2.4 How to integrate new media technology into ideological and political theory teaching for Shenyang red culture resources In the era of new media, the red cultural resources of Shenyang are processed and sorted out by good use of new media technology, and make use in the teaching of ideological and political theory.

3. Basic Ideas and Methods Linking Theory with Practice. A Method of Combining Theory and Practice

Under the background of "new media", the concept innovation and practice innovation can determine the thinking framework. Field investigation and investigation. Field excavation and investigation of Shenyang red resources, explore ideological and political teaching related content. Interdisciplinary analysis method. Integrate ideological and political courses with media majors to form the goal of "media + ideological and political courses". method of comparative analysis. According to the relevant research of integrating red resources into ideological and political course teaching in other regions, give full play to the local characteristics of Shenyang, and explore red resources into ideological and political course teaching.

4. The Place of Innovation

Concept innovation.

Break the barriers of journalism and communication, new media technology and ideological and political education, and an online and offline one-stop platform. Break the discipline barriers, integrate the new media concept innovation in the discipline concept of ideological and political education, and build the brand of red resource culture industry. 2. Platform innovation Using new media technology, build an ideological and political education platform, build an online platform, and build offline Shenyang red resources exhibition building. Form Shenyang red resources education base. Create a red campus, combine the red resources with the cultural and natural landscape of the

school, mark the Shenyang red resources and events on the campus road, and make the campus red publicity board.

5. Conclusion

Red resources are the best nutrients. Colleges and universities should closely combine the study of the party history with the fundamental task of cultivating moral education, base on the reality of colleges and universities, observe and innovate, use the red resources of colleges and universities themselves, tell red stories well, inspire the morale with the struggle and glorious tradition of the Party, and cultivate the spirit of the red gene. Colleges and universities should make full use of the red resources of Shenyang, steadily carry out various activities with distinctive characteristics, educate people with red resources, guide the majority of teachers and students to carry forward the red tradition, inherit the red gene, continue the spirit of Chinese Communists, gather forward momentum. We will strengthen our ideals and beliefs, and work together to draw a grand blueprint for the all-round Acknowledgements.
