Abstract: Aviation and national defense culture contains a strong sense of patriotism and patriotic service to the country, and provides strong cultural support for the comprehensive advancement of the army and national defense modernisation in the new era. In the new era, the aviation and national defense culture is integrated into the research of university education, in order to better explore and answer the guiding ideology, value goal, spiritual core, cultural vitality, and other important questions of the aviation and national defense culture and university education, and to gather strong spiritual power for the new era of comprehensively advancing the modernization of Chinese-style education.

Keywords: New Era; Aviation Defence Culture; Modernisation of Chinese Style Education; Nurturing Values.

1. Introduction

General Secretary Xi Jinping pointed out, "The Chinese nation has formed a broad and profound excellent traditional culture over thousands of years, and the revolutionary culture and advanced socialist culture forged by our Party leading the people in the process of revolution, construction, and reform have provided profound strength for the construction of Civic and Political Science Classes." [1] The report of the 20th Party Congress further specifies that it is necessary to "take the socialist core values as the lead, develop socialist advanced culture, and carry forward the revolutionary culture" [2]. Aviation defense culture is a great spiritual culture created by people based on aviation defense practice. The exploration and practice of aviation national defense culture resonates with the development of the motherland, and aviation national defense culture, as an important part of advanced socialist culture, is a powerful spiritual internal drive to inspire college students and a source of ideas and strength to cultivate newcomers of the times who are striving relentlessly to achieve the great rejuvenation of the Chinese nation.

2. The Endogenous Force of the New Era of Colleges and Universities Aviation and National Defence Culture Casting Souls and Educating People

The report of the 20th Party Congress has made a major deployment of unremittingly using Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era to forge the soul, which provides us with a directional guide and a fundamental guideline to strengthen the ideological construction of the Party in the new era [3]. Xi Jinping's new era of socialism with Chinese characteristics thought is the fundamental guiding ideology for the reform and development of the ideological and political courses in colleges and universities, adhere to the Xi Jinping new era of socialism with Chinese characteristics thought of casting the soul of nurturing, we must take the "casting the soul of nurturing" as the main line, to carry out the aviation and national defense culture of nurturing education. Civics

courses in colleges and universities are the main channel for cultivating souls and educating people, and the fundamental purpose of the construction of civics courses in colleges and universities is to cultivate a sense of political identity among students, to cultivate students' patriotic sentiments, so as to guide students to enhance the "four consciousnesses", to firmly establish the "four self-confidence", and to achieve the "two safeguards". "Two Maintenance" [4].

Therefore, casting the soul and nurturing people with Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era is the fundamental goal point of the new era of colleges and universities to integrate aviation and national defense culture into the cultivation of the ideological and political class, and it is also the endogenous power of developing socialist culture. Culture is the endogenous power of the nation's advancement, and as socialism with Chinese characteristics enters the new era, only by insisting on casting the soul and educating people with Xi Jinping's new era of socialist thought with Chinese characteristics, stimulating the endogenous power of aviation and defense culture, integrating aviation and defense culture into the civic and political class of colleges and universities, strengthening the content construction of the education of people with aviation and defense culture, and constructing the talent cultivation mode of aviation and defense culture, can it help to build the civic and political class of colleges and universities to achieve good This fundamental goal.

3. The Civic and Political Essence of Soul-Casting and Nurturing in the Aviation and Defence Culture of Colleges and Universities in the New Era

On 25 April 2022, General Secretary Xi Jinping stressed during his visit and research at Renmin University of China, "Whether the ideological and political theory class can play its due role in establishing morality and educating people depends on whether it is valued, adapted to or not, and whether it is done well or not. The essence of the ideological and political theory course is to reason, we should pay attention to the ways and means, to reason deeply, thoroughly, and live" [5]. Aviation national defense culture is the live

material of the reasoning of the civic policy class, and it is the distinctive spiritual coordinate of the reasoning of the civic policy class to speak deeply and thoroughly and live to learn well. The civic policy class of the university, as the key course to implement the fundamental task of cultivating morality and educating the people, is supposed to speak deeply of the reasoning contained in the aviation national defense culture, speak thoroughly of the reasoning of the key points of the knowledge of the aviation national defense culture, and speak live of the reasoning of the docking practice of the aviation national defense culture, so that the university students can learn well of the civic policy class so that they can To build the ideological foundation of continuing the red bloodline and striving to serve the country and provide a strong ideological and political guarantee for the cultivation of a new man of the age who will take on the great responsibility of national rejuvenation.

Therefore, colleges and universities should adapt to the diversified needs of college students in the era of information technology, give new momentum to the reform and innovation of the ideological and political courses, in order to effectively enhance the sense of college students' sense of access, sense of faith, and continue to enhance the effectiveness of the ideological and political courses, comply with the flourishing development trend of digital transformation of education, the deep integration of modern information technology with the ideological and political courses of colleges and universities as well as the aviation and national defense culture, and the aviation and national defense culture by the ideological and political courses of colleges and universities to build up the moral character and make the people alive. Through the role of the college political class, the aviation national defense culture will be deeply told and live, so as to continuously enhance the ideological, theoretical, affinity, and pertinence of the college political class, truly achieve the enlightenment and enlightenment, and stimulate the fighting spirit.

4. The Practical Path of Casting Souls and Educating People in the Aviation and Defence Culture of Colleges and Universities in the New Era

In July 2022, the Ministry of Education and other ten departments issued the "Work Programme for Comprehensively Promoting the Construction of "Big Ideological and Political Classes", proposing that we should insist on opening the door to run the Ideological and Political Classes, and fully mobilize the strength and resources of the whole society to build "big classrooms", "big platforms", and "big teachers". The program proposes to open the door to the ideological and political courses, fully mobilize the strength and resources of the whole society, build "big classrooms", "big platforms", and "big teachers", etc., which points out the direction and plans the path for promoting the construction of "big ideological and political courses". In the environment of

social practice, culture is often pluralistic and heterogeneous. Civic and political courses in colleges and universities should take Xi Jinping's theoretical system of socialism with Chinese characteristics in the new era as the main teaching content, and insist on using scientific theoretical and cultural knowledge to guide students' practical activities. Under the perspective of a "big ideological and political class", colleges and universities need to continuously expand high-quality educational resources, and aviation and national defense culture, as the sum of material and spiritual wealth created by the Chinese people in the construction and struggle to develop aviation and national defense, safeguard the sovereignty, territorial integrity and security of the country, and defend against foreign aggression and subversive threats, should become the basis for colleges and universities to promote the development of aviation and national defense, and to promote the development of the national defense. It should be a high-quality educational resource for colleges and universities to promote the combination of the small classroom of ideology and politics and the big classroom of society.

Therefore, it is necessary to teach the "big ideology and politics class" in the new era, make good use of the "big classroom" of the social practice of aviation defense culture, and promote the combination of the "small classroom" of ideology and politics and the "big classroom" of the society in the education of aviation defense culture. The combination of the "big classroom" of aviation defense culture education and the "big energy" of the whole society is the right meaning of the role of the ideological and political class in establishing morality and educating people. The organic fusion of aviation defense culture and college civic education can strengthen the function of cultural education, enhance the effectiveness of civic education, form a comprehensive pattern of cultural education, and help college students in the social classroom with complicated information and diverse concepts to provide the correct value guidance for social practice.
