Exploring Responses to Quality Education and Teaching

Keling Liu

Graduate School of Education, Graduate University of Mongolia, Ulaanbaatar, Mongolia

Abstract: The development of the country and society needs the support of talents, and education teaching is an important carrier for cultivating talents. Quality education and teaching achieve the development of talents, how to explore the value of education. Casting quality education and teaching has always been the focus of people's attention at this stage, so that the value of education comes to the fore and becomes the root of comprehensive education, so that people get the baptism of education, access to education, and ultimately immersed in high-quality education and teaching, with a firm belief in the development of the forward and a solid foundation. The current task in the pursuit of quality education and teaching to open up a new world, innovation in education and teaching methods. Personalized teaching in the value of education unreservedly embodied, so as to achieve a strong country of talent and education. This paper stands on the perspective of mining the value of education, in order to explore the pursuit of quality education and teaching as a starting point for a detailed analysis.

Keywords: Educational Value; Quality Education and Teaching; Countermeasures.

1. Introduction

Quality education in human development has a strong value that cannot be ignored, the embodiment of the flavour cannot be ignored. At the same time, the novel and vivid education casts the foundation of promoting the comprehensive development of human progress, in the continuous optimisation of education and teaching under the cultivation of talents harvested inexhaustible power and source. With the new education concept can make students have the opportunity for comprehensive development, at the same time, a strong atmosphere of nurturing people to mould people with increased efforts. Education should be firm beliefs, so that everyone has the guidance of thought, baptised in the education of the heart. Purify the soul. Enhance the power of education and teaching to give full play to the value of education, which is better to make quality education and teaching manifest.

2. The Value of Quality Education for Human Development

School education implementation process always take quality education as the fundamental human development, because quality education in the process of promoting human development highlights the value is not to be ignored. Therefore, it is necessary to take the concept of quality education as a starting point to really bring out certain advantages in the perspective of human development.

Firstly, quality education gives great propelling power to people and possesses ideological belief support. Quality education and teaching can convey brand-new ideas to students and make their beliefs stronger, so that they will keep a positive mindset in both life and study. The positive energy contained in the palm of education is infinite and enormous, which cannot be ignored for the leadership and development of human beings. Students are not mature enough to grow and develop, and need guidance and help from the right concepts.

Can bring out the correct ideas and values, so that students will not go astray under good leadership. Secondly, quality education and teaching will make people have good quality and comprehensive quality. High-quality education and teaching allow students to get some help and guidance in their overall development, and to find the direction of development and the way forward in the process of improving self-quality. High-quality educational work to create new horizons, exercise the physical and mental qualities of students, so that students can be active in the learning of thinking, and bravely meet the challenges of the learning path. In the face of a series of difficulties and obstacles in learning, always maintain a strong desire to meet the challenge of their own strong faith, and constantly improve themselves.

Thirdly, quality education leads people forward to develop and gain a healthy body and mind. Under the pioneering of quality education, people can be led forward to develop a healthy body and good mental state. Because education achieves and moulds people, every student gains strength in the process of exploration, exercises both body and mind, and is able to have the direction of continuous improvement in a healthy state. At the same time, adjust the state of learning and the concept of cognition, so that their own development in the development of the main to maintain a full of enthusiasm, really create their own development of a broad space.

3. Excavate the Value of Education, the Pursuit of Quality Education and Teaching Specific Countermeasures

3.1. Establish the Concept of Education, Promote Comprehensive Development

In order to truly reflect the value of education, it is necessary to establish a clear concept of education. The concept of educating people leads the development of quality education and teaching and promotes the comprehensive development of students. The overall development of students is also the pursuit of education, but also the focus of quality education. Education and teaching need to first establish a clear concept of parenting, so that the morality of the people to become the first, and constantly promote students to have a good character. At the same time, the implementation of comprehensive education focuses on the multidirectional development of students, so that the education of people first as a key educational strategy, in order to create a high-quality

education and teaching system. In the end, the concept of human-centredness will become a key force in the optimisation of quality education. The following combines the establishment of the concept of nurturing, and promotes comprehensive development to make a detailed exploration.

First of all, to establish morality as the fundamental, let moral education. Education and teaching implementation of moral education first, only have good quality and quality, can be stable in the life of the foothold. How to implement the key concept of moral education has become a key point of focus at this stage, moral education can enrich the connotation of education and teaching, and constantly optimise the work system. Standing on a new vision, let moral education enrich the content of education work, and then the smooth promotion of education and teaching to provide a forward direction. Education and teaching is regarded as the fundamental, each subject should become a moral practitioner, have a good character, noble personality, really present their own unique charm, better in the quality of education and teaching in the optimisation of self.

Secondly, to realise the idea of comprehensive education, educating people first. The establishment of the comprehensive education idea, so that the work of education to obtain a clear ideological guidance and direction to help. The idea of comprehensive education embodies the focus on the development of all aspects of students, in addition to cultivating the moral character of students, but also need to pay attention to the development of students' independent ability, learning ability, thinking ability and so on. Focusing on personalised growth process can make the system of comprehensive parenting to build an excellent direction.

Finally, the implementation of the people-centred concept to optimize education. The determination of the people-centred concept mainly refers to some education and teaching closely around the students, so that the students' master status is really played out. Only in this way, education and teaching will present certain values better. Students regarded as simply become the master of the classroom, but also truly embodies the spirit of ownership, so that quality education and teaching always lead the students forward.

3.2. Create an Active Atmosphere, Create a Lively Education

How to make the value of education and teaching really highlight, digging the essence of education, we need to focus on vivid education, to create an active atmosphere. On top of the new educational perspective, it can provide a solid foundation for vivid education and create more conditions for preparation. As a result, it is necessary to stand on the right path to bring support and preparation for the quality development of education and teaching.

First of all, create a strong educational atmosphere around modern technical means. The development of science and technology is integrated into many fields to promote the development and progress of many aspects. Modern teaching technology into the field of education, so that education under the conditions of obtaining convenient for students' education to provide unprecedented good support. In daily teaching through modern teaching technology to create a different learning experience for students, with a good learning experience and perspective. In-depth enhancement of the application of technology, can bring a new experience for students. Modern technical means can be integrated into the microclass mode, microclasses in the education and teaching of the key difficulties reflected in each step to make a detailed breakdown of the fragmented content can be more unreservedly interpreted, so that the students for the understanding of the knowledge will then be more thorough and easier.

Secondly, reflect the power of campus culture, optimise the education and teaching system. The power of culture cannot be ignored, which is also an important essence and value embodiment in the development of education and teaching. With the power of campus culture, the education and teaching system becomes more innovative and perfect, which is also the key direction of the implementation of the full range of vivid education. Therefore, daily education and teaching must be matched with a good campus culture, can create a positive and serious learning attitude within the campus, so that every student with a positive state of mind to constantly participate in the exploration and exchange of good ideas, can be courageous to meet the challenges of learning to establish a high-quality direction. The value of cultural education will be highlighted, so that this theme really becomes the actual direction of the implementation of vivid education work.

Finally, strengthen the interactive teaching guidance, stimulate the progress of education and teaching. Interactive teaching guidance is also a guarantee that every subject has a connection with each other, only interaction can make education and teaching vibrant, will not lose vitality, stimulate education and teaching progress, so that every teaching link releases great power, thus impacting the students' hearts. Moving forward on the road of knowledge exploration, and firm beliefs, not forgetting the original intention of learning. With the problem-led interactive mode, it allows continuous communication and exploration between the various subjects, and has the guarantee of submerged learning under the serious analysis of the specific theme. In addition, the use of interactive game mode, gradually introduce students to a more active learning state, can be said to constantly stir up the ripples of teaching, so that the students' inner desire for knowledge is more intense.

3.3. Grasp Diversified Means, Highlight the Essence of Human Education

The application of diversified educational teaching means can promote the practice of education, so that the value of education is reflected, the real pursuit of quality direction and goals. How to bring out the essence of education, we need to plan the means of education teaching, with a new perspective to make the implementation of education work more innovative and perfect.

First of all, the main group cooperation to improve the learning effect. Cooperative group learning is the key vehicle to reflect the ability of each student, which will also gradually strengthen the learning effect of students. Therefore, in the implementation of diversified means of education and teaching, group cooperation as the foundation, according to the students' learning status, personal characteristics of the group can be divided into groups, and then work together for the assignment of the task to gradually explore. In cooperative learning, we can find the connection between knowledge, explore the strengths and characteristics of each member, so that we can have the power to move forward under the feeling of the mystery of knowledge. Collaboration in the students can release themselves from the restrictions of the classroom, bravely express their inner views and opinions, which is the key to more flexible thinking, but also helps the development

of students' learning ability.

Secondly, the implementation of personalised display, optimising learning content. The main thing is to let the students become the main body of education and teaching, try to play the role of "small teacher", the content of learning to reflect. Through this way to enable students to understand the source of knowledge and their own mastery of knowledge, which is undoubtedly a high-quality learning method. At the same time, in the process of pursuing quality education work also gained a broader space, which is also a great contribution to the improvement of their own ability. As a result, students are given the opportunity to show themselves, students according to their own characteristics, the knowledge will be presented in a new look, and other partners in the class, so that they can become a role model for learning, and continue to summarise and sublimation of knowledge research.

Finally, contextual teaching is the foundation to ensure the quality of learning. Contextual teaching methods have always been the focus of many teachers, but also a more important means of education and teaching. Contextual construction can let students carry out role-playing, combined with the knowledge content of learning to strengthen communication and exploration, which not only allows students to have a desire to explore the process of knowledge, to maintain a strong interest, but also in the exploration of more active, in a lively and innovative space.

4. Implementation of Rich Activities, Taste the Charm of Human Education

Activities can make the substance of education and teaching better highlighted, the perfect combination of theory and practice, and can also be associated with education and teaching, student specifics. In the activity practice to strengthen the knowledge, better to gradually upgrade the learning content into their own learning content. Therefore, in order to catch up with the high-quality target system, education and teaching should be gradually optimised and explored in practical activities, so that students can find opportunities for improvement under the exchange of practice as well as self-competence exercise. For example, knowledge competitions, you can organise students to exchange and analyse around specific knowledge topics, which undoubtedly increases the fun of learning, but also allows students to maintain a strong sense of competition under the learning state is getting better and better, and better learning beliefs in the learning path to better find the opportunity to improve their own abilities. Learning culture sharing and exchange activities, the organisation of learning salons, so that students around a certain knowledge framework and theme, constantly express their inner feelings. In addition, the creation of knowledge exchange conference. Combined with their own practical interests to build groups, in the interests of the summary, summarise and generalise the effective implementation of learning content under the better. Combined with the deficiencies in learning to learn from excellent partners to learn from each other's strengths and weaknesses, common progress and growth. Eventually, according to the quality of learning methods to share the corresponding content step by step to explore. Analyse the differences in learning perspectives, so as to better improve learning ability.

5. Conclusion

Comprehensively analysed above, education shapes people, education influences people, education achieves people, which is the value of education and the pursuit and destiny of quality education and teaching. When the value of quality education for human development is embodied, it will make people make progress, and they will find their own direction and forward opportunities in the bath of education. Therefore, this article from the novel concept of education, a strong atmosphere to create, a variety of means of implementation, a wealth of activities to create these aspects of the investigation, so that quality education and teaching in the establishment of a clear pursuit of the roots of a better landing. Quality education is rooted in every activity, so that people in learning, life and other aspects are better protected, with a series of support. The future implementation of education and teaching is still to be carried out in the pursuit of quality education and teaching perspective, hoping to make the strategy of strengthening the country with talents truly realised.
